

GMCraft 60/30 Weather-Resistive Barriers

Product Data Sheet

GMCraft is asphalt saturated building paper, which is also described as a weather-resistive barrier, or moisture barrier. It is designed for installation behind stucco, and other exterior wall claddings as a “secondary weather barrier”. **GMCraft** provides the needed protection from internal wall damage due to moisture leakage and condensation.

GMCraft is a “weather-restrictive barrier” as described in Section 1404.2 of the 2000 International Building Code® (IBC) and also qualifies as a “weather-resistive sheathing paper” as described in Section R703 of the 2000 International Residential Code™ (IRC).

GMCraft exceeds the standards set in Federal Specification UU-B-790a, Type 1, Grade “D”, Style 2, in accordance with Section 1402.1 of the 1997 Uniform Building Code (and subsequent editions).

GMCraft has maintained an ICC (formerly IBCO) Evaluation Report, No. 5924 since October of 2000 and satisfies test criteria for weather-resistive barriers (AC 38) dated July 2000. **GMCraft** maintains ongoing testing to insure that it meets or exceeds industry standards (including ASTM D-779-03, ASTM D-828, and ASTM E-96-03) and has applied for ongoing approvals from ICC ES.

GMCraft is announcing the introduction of packaged combination of 1 layer of 60 minute and 1 layer 30 minute weather barrier to be known as “GMCraft 60/30 Double”. (See test results below). This product provides superior protection at an affordable price. Cumulative results will be greater than sum total of liners!

Test Results

GMCraft 60/30	.	Test Results	Fed Spec. UU B 790a
Water Vapor Transmission	ASTM E-96-00	200 perms	35 perms (min)
Water Resistance	ASTM D-779	<u>1 hour+</u> ➤ <u>.5 hours+</u> total > 1.5 hrs +	10 minutes
Tensile Strength	ASTM D-828	MD comb. 90+ lb-f/in CD comb. 64+ lb-f/in	MD 20lb.-f/in CD 20lb.-f/in
