Consider The Advantages

- **Installation** - Liberty Classic Stone is installed using a traditional method with which masons are familiar. It is laid like brick or quarried stone.
- **Weight** - At 18 to 20 lbs. per square foot, Liberty Classic Stone weighs only a fraction of quarried stone.
- **Availability** - Liberty Classic Stone is available in unlimited quantities without texture and color inconsistencies.
- **Color Selection** - Liberty Classic Stone offers builders the option of choosing a stone color which may not be available in that region in a quarried stone.
- **Versatility** - Liberty Classic Stone can be laid as a base for brick, or can be laid on top of brick. It can also be used for both interior and exterior applications.
- **Packaging** - Liberty Class Stone arrives at the jobsite in convenient boxes which are placed for ease of installation. Each box contains a pre-determined amount of stone allowing for easier ordering and less waste.
- **Warranty** - Liberty Classic Stone has a 30 year limited warranty. Find warranty information on our website at www.lonestarstone.com/liberty.
